

I feel that to give LPFM priority over current FM would not be in the best interest of the majority. I for one have a great need and love of my local station k-love. This station is the only one of its kind that can be heard in my area. This station provides spiritual comfort and assistance to its listeners. It provides the community with a place to turn when one is in a crisis. As an evangelical I find further believe that this would infringe on my freedom of religion rights by limiting my access to such programming. I hope that you will consider people such as myself in your decision.
